

CollaborationRoom.ai

Make remote work, work.

Boost Employee Productivity From Anywhere

CollaborationRoom.ai provides a new way to engage and develop teams in a remote work environment. Using our patent-pending solution, supervisors and instructors can manage their teams as if they were together in the same office.

INCREASE ENGAGEMENT

Using artificial intelligence, we measure emotions & facial expressions. If an employee is exhibiting signs of being overwhelmed or frustrated, their manager will be alerted to step in.

INCREASE PRODUCTIVITY

Our technology lets supervisors view employees at their remote workstations and monitor their screens in real time.

INCREASE COMPLIANCE

Stop malicious behavior and keep customer information safe. Our software detects other individuals and cell phones in the employee's work environment.

Hear From One of Our Partners

CCMR3 is a full-service accounts receivable partner specializing in first- and third-party collections, debt purchasing and litigation services.

CollaborationRoom.ai has given CCMR3 the opportunity to implement a remote-hybrid work environment without compromising employee productivity or engagement. In fact, employees who work remotely while using CollaborationRoom.ai have proven to be more productive & effective than ever before.

— Jacob Corlyon, Co-founder & CEO, CCMR3
